

Staycell ONE STEP® Intumescent Spray Foam Systems

*All-foam alternatives to 15-minute
intumescent paint thermal barriers*

THE ONE STEP® PERFORMANCE ADVANTAGE

- Save up to 40% vs. standard ccSPF & intumescent paint
- Superior fire resistance – passes UL 1715 fire test exposed, improving performance & safety
- Suitable for installation between 10°F – 120°F & up to 85% RH without supplemental heating or dehumidification
- Improves fire safety during construction – protects against accidental fires caused by welding or cutting torches
- Redundant fire safety after construction. Where gypsum board is installed over the SPF as the interior finish, ONE STEP® protects against potential fires behind the drywall caused by electrical shorts or maintenance activities.
- Tested & certified by QAI Laboratories, Inc.

Staycell ONE STEP® Systems

SINGLE-LAYER SYSTEM

Staycell ONE STEP® 502 HFO

TWO-LAYER HYBRID SYSTEM

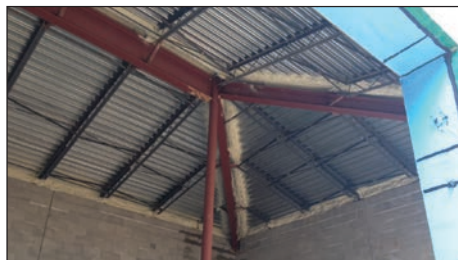

Staycell® 504 HFO

USER BENEFITS

- Superior R-value compared to fiberglass, reduces heating/cooling costs
- Creates seamless air barrier that eliminates energy loss thru air leakage
- Strengthens roofs and walls increasing structural integrity
- Provides vapor retarder that controls moisture problems
- Formulated with highly insulating HFO blowing agents and recycled plastic materials
- Meets strict VOC & AQMD emissions requirements – no formaldehyde or ozone-depleting ingredients

TYPICAL APPLICATIONS

- Metal buildings
- Masonry buildings
- Cold storage
- Underside of roofs/floors
- Ceilings
- Walls
- Foundations
- Siding
- Windows
- Attics
- Crawl spaces
- Ducts
- Tanks
- Piping
